CPQ GEN II 3 1500RF RH STD VERT

Liquid Level Control | Gen II Liquid Level
Controller

3" 1500 RF

Operation: **Pneumatic**
Pilot Type: **Vent**
Right Hand Side Mount
Vertical Displacer

Options Included In This Model:

- Displacer or Float Material: **PVC**

Field-selectable between snap and throttle level control (span of levels vs holding consistent level). Also, field reversible between direct and indirect output signal. These controllers are great for interfacing (sensing and holding a level between two different specific gravity liquids in a tank). Several different displacer options available to handle an array of different possible conditions: small differential liquid specific gravities, high temperature, corrosion, large span, small tank diameters, and small access openings. Easily switch from Vertical to Horizontal displacer orientation.

Specifications

Connection Size: **3 "**
Connection Type: **1500 RF**
Body Material: **Steel**
NACE MR0175 Compliant
Pilot Type: **Vent**
Pilot Output: **Direct or Indirect (Field-selectable)**
Max. Working Pressure: **3705 psig**
Mounting Orientation: **Right Hand Side Mount ***
** Right Hand means if looking at the front panel of the Gen II, it mounts on the right hand side of the vessel, and vice versa for Left Hand.*
Displacer Orientation: **Vertical**
Operation: **Pneumatic**
Catalog Page: **C1:10.2**
Repair Kit P/N: **RMD**
