

ELECTRIC LEVEL SENSOR

As the "eyes" of the separation process, the Electric Level Sensor continuously measures the liquid level in your production vessel and communicates that information via 4-20 mA signal to your control system.

KIMRAY

AUTOMATED CONTROLS MADE SIMPLE™

ELECTRIC LEVEL SENSOR

SIMPLE DESIGN

NPT or flanged connection and two-button calibration make the Electric Level Sensor easy to install.

SEAMLESS INTEGRATION

Delivers a standard 4-20mA output that integrates with existing automation systems with no proprietary software required.

LOW MAINTENANCE

No wearable parts, meaning the only maintenance required is on the displacer in your production vessel.

TECH SPECS

- Class 1 Div 1, Group B
- Compatible with 2"-5" line sizes
- NPT & Flanged connections
- 4 to 20 mA
- 0 to 30 VDC; 30mA maximum
- CSA & IECEx/ATEX certified
