

June 22, 2021

Kimray Partners,

This notice is to provide you with additional information regarding Kimray's mandatory product recall of the 7350C6 castings stamped with a 3CE heat code.

On June 3, 2021 Kimray identified that 76 castings with the heat code 3CE contained a possible defect. Continued use of this product may risk injury to personnel, cause equipment failure, and damage to property.

As we discussed, we need you to immediately examine your inventory and take out of service all products subject to this recall. It is Kimray's position that all affected products need to be replaced. However, not all 7350C6 castings are affected – only those with a 3CE heat code.

We are communicating with all known customers that may have purchased these products, but if you identify additional customers with affected products, we ask that you notify them immediately of this product recall. Your notification must include a copy of the Recall Notice provided by Kimray.

Kimray will begin replacing any identified products immediately upon notification. Kimray will also provide a recommended customer letter or email message.

This recall is being carried out in accordance with Kimray's mission to "Make a difference in the lives of those we serve." Our customer's safety is our utmost concern and priority.

The program coordinator for this recall is Kimray Product Manager Brian Levings. If you have any questions regarding this recall, please call him at (405) 525-6601 ext. 1149 or email him at [blevings@kimray.com](mailto:blevings@kimray.com).

Sincerely,

A handwritten signature in black ink, appearing to read "Dustin Anderson", with a long, sweeping underline that extends to the right.

Dustin Anderson  
Vice President of Sales and Marketing  
Kimray Inc.
