

LOW PRESSURE HIGH VOLUME VALVE

3" Full Port and Reduced Port Now Available

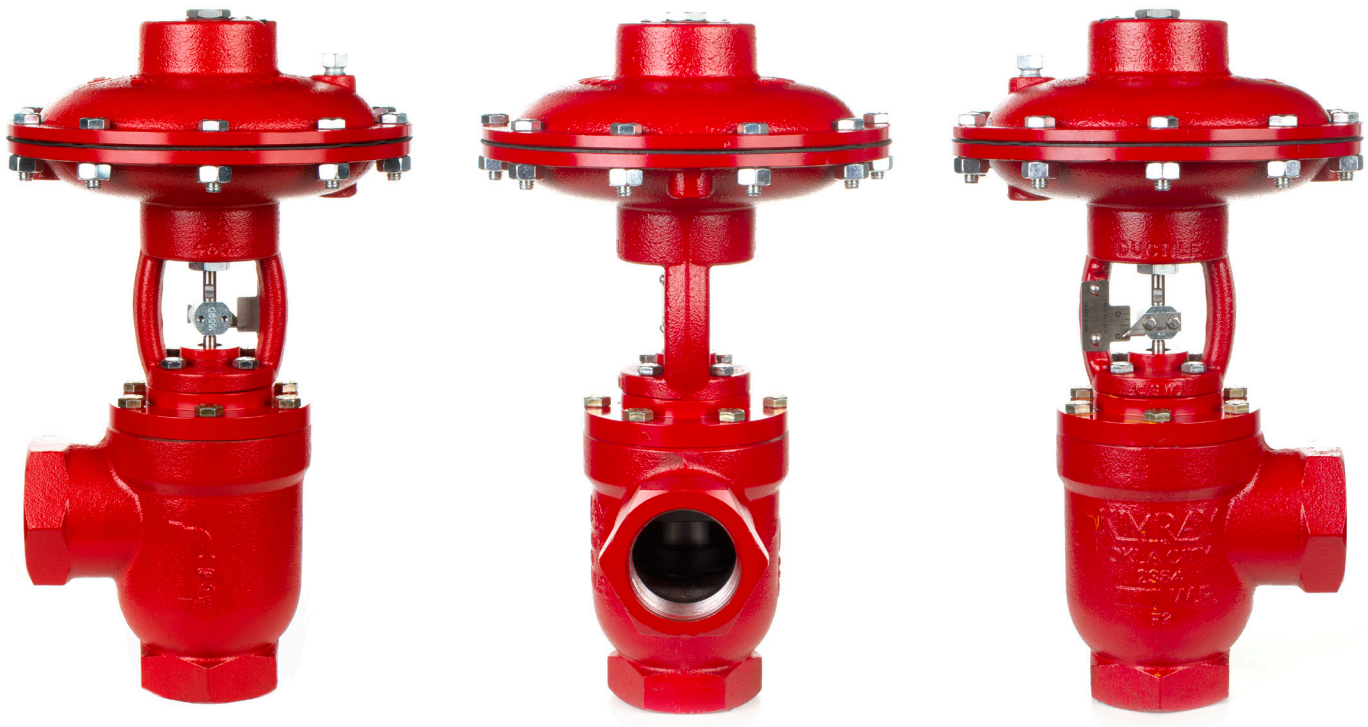

This product notice is to inform you that the Low Pressure High Volume Valve will be available Nov 12th in 3" Full Port and Reduced Port.

On the initial release of this product, 2" reduced port was the only size available. Since then we have released a 2" full port. (Cv values 54 full port, 29 reduced port)

The new 3" full port has a Cv of 109 and the reduced port has a Cv of 72, which will allow producers to flow more production fluid than other existing 3" valves.

Products are now available for pre-ordering.

The Low Pressure High Volume Valve is designed specifically to extend production time through flowback and in erosive applications. To learn more visit <https://blog.kimray.com/limit-valve-damage-with-the-low-pressure-high-volume-valve/>.
