

NOW AVAILABLE: 1" OUTSIDE SUPPLY REGULATORS

This product notice is to inform you that the following regulators are now available in 1" connection sizes:

- Back Pressure with Outside Supply Regulator (BPOS)
- Pressure Reducing with Outside Supply Regulator (PROS)

These regulators are designed to accept an outside source of supply to the pilot rather than using the process gas.

This design allows the regulators to use either clean, dry gas (from a higher/dryer source on site) or compressed air as the outside source of supply for emissions-free operation.

Here are the order codes for the 1":

	Back Pressure	Pressure Reducing
1"	ACG (SGT BPOS-D)	AWA (SGT PROS-D)

If you would like to convert your existing 1" standard back pressure (BP) or 1" pressure reducing (PR) regulators over to the new outside supply configurations, here are the parts you will need to order:
