

NOW AVAILABLE: 4" HIGH VOLUME LIQUID DUMP VALVE

This product notice is to inform you that we are now offering a 4" version of the Low Pressure High Volume Valve.

Operators have seen great success with the 2" and 3" LPHV, especially in highly erosive conditions. Now we are able to offer the same outstanding performance for customers with 4" 150RF flanged connections.

The 4" LPHV is offered with an angled body or thru body, full port or reduced port, with trim material options for normal, erosive, and corrosive conditions, and HSN standard elastomers or optional FKM.

Base codes: MYQ Angled Body, MYR Thru Body

Plug Assemblies: MYT Full Port, MYT5 Reduced Port

Repair Kit base code: RYZ

Following the release of this new option, all 4" PBT Pneumatically Operated Liquid Dump Valves will be discontinued. Orders for valves beginning with the following codes can be placed until Jan 31, 2024. We will continue to support these valves with replacement parts and kits indefinitely.
