

DISCONTINUING STEEL CASTINGS FOR MOST DUMP VALVES

This product notice is to inform you that we will be discontinuing the option of steel castings for most of our Weight Operated, Lever Operated, and Pneumatically Operated Dump Valves.

These versions of dump valve were an old option that has effectively become obsolete due to our use of standard ductile iron castings. Most, but not all steel valves will be discontinued, only those that have zero or very low demand in recent years.

A complete list of valves and components to be discontinued is included on pages 2 and 3 of this document.

For customers who would like to order any remaining stock of the valves to be discontinued, please contact your authorized Kimray store or distributor to check stock and place orders prior to June 15, 2025.
