

## CATCO PRICING UPDATE

**This notice is to inform you that all Catco products will receive an average price increase of approximately 5%, effective April 6, 2026.**

Catco, manufacturer of our catalytic heater series of products, has informed us that due to ongoing cost increases in raw materials, labor, and tariff-related impacts, they will be implementing a weighted average price increase of approximately 5% across their products.

Note that if your project has already been quoted, we will honor that pricing until expiration, whether or not it delivers by or after April 6, 2026. New pricing will be effectively immediately on all new orders placed that ship after April 6, 2026.

Please contact us for info on the adjustments or if you have any questions.
